🎯 Career Objective

Seeking a for a front-end developer position in a stable company where I can use my skills for the benefit of the company.

I am a passionate and highly skilled front-end developer with excellent communication abilities.

Study in Al-Azhar University I also have strong knowledge of some programming languages As a Front End Developer

I also have a set of strong technical skills and a passion for software development. Dedicated to writing clean, high-quality, maintainable code. Skilled at collaborating with cross-functional teams and demonstrating a keen interest in staying up to date on the latest technologies and trends in the software industry.

🎓 Education

- Student in the fourth year at the Faculty of Sharia and Law, Al-Azhar University, in the fourth year
- Student at the Institute of Information Systems in Cairo

📁 Projects

FreshCart

Developed a React-based e-commerce platform with dynamic product listings, shopping cart functionality, and a checkout process. Utilized React Router for navigation and managed state with hooks like useState and useReducer."

YummyWebsite

Developed a meals web app using HTML, CSS, and jQuery, integrating an external API to dynamically display meal information. Implemented features like meal search, filtering, and responsive design to enhance user experience."

BookMark

Built a CRUD web application using HTML, CSS, and JavaScript, enabling users to Create, Read, Update, and Delete data via URL routing. Designed a clean and interactive UI to manage data efficiently.

CURD

Developed a store management system using HTML, CSS, and JavaScript to showcase products. Implemented full CRUD functionality to Create, Read, Update, and Delete product entries, with a user-friendly interface for managing product data."

Weather

"I developed a weather forecast website using HTML, CSS, and JavaScript that displays the weather forecast for three days. The site allows users to enter the name of any city, and the displayed weather data is dynamically updated to reflect the current weather conditions in that city. The project includes API integration to retrieve data in real time, which enhances user interactivity and provides a practical solution for weather updates."

Calculator

Designed and developed a functional calculator using HTML, CSS, and JavaScript, with a clean and responsive interface. Implemented basic arithmetic operations and user-friendly interaction."

SimpleLoginSystem

Developed a simple login page using HTML, CSS, and JavaScript, with form validation and secure input handling to authenticate users."

Mealify-landing-page

Created Mealify, a meal showcase web project using HTML and CSS. Designed a visually appealing interface to display meal options and enhance user experience."

Design Semple Website

A simple website is developed using HTML and CSS, and includes animations to enhance user interaction and visual appeal. The project features a clean design with attractive animated elements to improve the overall user experience."
